

We submit that there is no guaranteed
LONG TERM STORAGE OF NUCLEAR WASTE
and it should not be stored in South
Australia as South Australia has had
its fair share of radio activity from Maralinga
in the 1950-1960 due to wind change
resulting that places in its path of a
radio active cloud over areas as far as
ADELAIDE received a dose of radio activity.

The academics that form this commission
must know this and know that it is
wrong.

also if TOXIC WASTE STORAGE is so safe
why are other countries lining up to pay
us billions of dollars to take it.

It always seems as if money or the
economy trumps over the environment.

Only when the last TREE has died and
the last RIVER has been poisoned and
the last FISH caught will we realise
that we cannot EAT MONEY.

A definite 'NO' to NUCLEAR POWER as
SOLAR + WIND POWER are ECO friendly and
do not pollute the environment.

We beg you to please think carefully about
the future of our grandchildren and
great grandchildren as they are OUR FUTURE
GENERATIONS.
